PROFILE

ML engineer with an applied-mathematics background. I build complete machine-learning systems — data, models, evaluation and the service around them: LLM applications and classical ML. **1st place in the Kaggle TPY2026 competition.** Shipping production products end to end since 2023.

SELECTED WORK

Kaggle TPY2026 — machine-learning competition · kaggle.com/c/tpy2026 1st place

- Won the machine-learning competition with ensembles of classical models, feature engineering and a careful cross-validation scheme.

Python · scikit-learn · ensembles · feature engineering

Kronik — learning platform with a personal AI assistant

EdTech

- Designed the backend and the course and material management; integrated an LLM assistant that helps each student as they progress through a course.

FastAPI · LangChain · LLM APIs · PostgreSQL

SARA — voice assistant for the desktop

archived

- Voice and text control of a PC: speech recognition, LLM orchestration with LangChain and system calls that automate routine tasks.

Python · speech recognition · LangChain

EXPERIENCE

Backend and full-stack developer · freelance

2024 — present

- **Abstract** (abstract.uz) — inventory, write-off and rental platform for film equipment. Built alone, from the database design and server logic to the front end and deployment.
- **Rizz Studio** (rizzstudio.uz) — streaming platform for my own music: track catalogue backend, player and interface.

Django · PostgreSQL · Docker · REST API

EDUCATION

Lomonosov Moscow State University, Tashkent Branch

2023 — 2027

B.Sc. Applied Mathematics and Informatics · linear algebra, probability theory, numerical methods

SKILLS

Machine learning scikit-learn, ensembles, feature engineering, cross-validation

LLM LangChain, RAG, LLM APIs, speech recognition

Backend Python, SQL, FastAPI, Django, Celery, REST API

Infrastructure PostgreSQL, MySQL, Redis, Docker, Linux, Git

Languages Russian — fluent · English — B2
